

## Workshop template "How to implement LEADER/CLLD added value in the local development strategies" 23.6.2021

To rapporteur and moderator of working group: Please follow this template in the workshop and reporting

Rapporteur: Johanna Grundström Sweden

Moderator: Catarina Nordin Torpe Sweden

Participants of the group: Marjan Boers Ireland, Elena Labropoulou Greece

1. What practises do you use to generate added value in your daily work? (The added value is improved social capital, good governance and better results, that are generated from the seven principles)
  - At the office (templates, workingmodels, other...)
  - With the LAG (organising local activities, communication, engagement of local people, animation activities...)

Elena: Taking short notes of interesting activities and happenings to share on social media. Enhance Leader work to the public. Organise local activities and meetings among local groups (connecting people). Projects involving youth, they are enthusiastic. A somewhat weak culture of community work in Greece. A struggle for women and equality due to the pandemic.

Marjan: Trying to generate the positives in Leader and not focus on paperwork. Solutions for easy access, for example pre-application workshops or webinars on Leader. An added value with Leader is good governance and preparing for other sorts of fundings. Community work is strong in Ireland, making cooperation with other organisations easy.

Catarina: Working hard to simplify and minimize the burden of bureaucracy. Storytelling by film as a way to show good examples. Community work is strong in Sweden as well, but a challenge is that the most engaged people are getting older.

Johanna: Step-by-step-guides. Visualising impact by plotting projects on digital map. Involving youth in the process of the new local development strategy – a success.

2. How do you use lessons from these practices in the development of your new Local Development Strategy? (So that the future LDS will generate added value)

**European Leader Association  
for Rural Development**  
Brussels, [www.elard.eu](http://www.elard.eu)

**SWEDISH  
PRESIDENCY**  
2020-2021

3. Most exiting examples or learnings in the group in relation to added value
